

Which of the following is a key objective of cyber intelligence?

- A) Preventing physical attacks
- ===B) Collecting and analyzing data to predict cyber threats ☒===
- C) Developing new programming languages
- D) Encrypting all internet traffic

Which intelligence-gathering technique is commonly used in cyber intelligence?

- ===A) Open Source Intelligence (OSINT) ☒===
- B) Financial Intelligence (FININT)
- C) Human Intelligence (HUMINT)
- D) Emotional Intelligence (EQ)

What is the primary purpose of threat intelligence feeds in cyber intelligence?

- A) To detect and analyze emerging cyber threats ☒
- B) To improve software performance
- C) To store user passwords securely
- D) To monitor social media activity

Which of the following is a common indicator of compromise (IOC) in cyber intelligence?

- A) High CPU usage
- B) Unexpected outbound network traffic ☒
- C) Increased email spam
- D) Slow internet speed

What is the main advantage of using Artificial Intelligence (AI) in cyber intelligence?

- A) AI can replace all human analysts
- B) AI can automatically identify and mitigate threats faster ☒
- C) AI prevents all cyberattacks
- D) AI increases internet speed
